FINANCIAL AND COMMERCIAL. MONEY MARKET.

TUESDAY, July 1-6 P. M. The stock market opened active and buoyant this mora-ing. There were very large sales of all the leading rail-road stocks, particularly of Eric. New York Central and Reading were in demand, and closed at an advance. The transactions were unusually large in Cleveland and Toledo, and an improvement in prices was realized. Illinois Central, Cleveland and Pittsburg, Milwaukie and Mississippi, and Panama, sold to-day, dividend off. None lividend paying railroad stocks, this is usually the case under an easy money market. The fact that the dividend under an easy money market. The fact that the dividend thas just been paid is soon lost sight of, and purchases are made in anticipation of the next. At the first board to-day, New York Central 6's advanced 3', per cents Erie Bonds, 1875, 3', illinois Central Bonds, 1; Canton Company, 3', Cumberland, 3', New York Central Railroad, 3', Erie, 13', Hudson River Railroad, 3', Reading Railroad, 1; Mickigad Central Railroad, 3', Wisconsin Lake Shore, 3', Galena and Chicago, 3', The advance in all the leading railroad stocks has been very great during the past week, and it is about time to look for a reaction, particularly in those which have risen the thatest. In Erie the improvement within the past ten days has been nearly six per cent, and the transactions in that time have been equal to more than one hundred thousand shares of stock on the entire capital of the comthousand shares of stock on the entire capital of the com-pany. The movement since about the 20th of June has been steadily upward, without a pause. It is therefore time to look for a reaction, for one is sure to come. We do not beer of any combination in Eric railroad stock. No clique has been formed for inflating prices. All the purchasers appear to act independent of each other in buying, and we have no doubt they will do the same in elling. It is always wise to realize good profits, and the brokers more frequently do so than outside operators. A profit of three and four per cent in as many days is a temptation which the most experienced operator cannot resist, and the probability is that parties who a few resist, and the probability is that parties who a few weeks since were large purchasers of stocks generally, will, before the lapse of many days, be sellers. Operations in Milwaukie and Mississippi Railroad stock, during the past six months, have paid enormously. In December lastithis stock sold at 85 per cent, dividend on. In January the company paid five per cent in cash and seven per cect in stock. A few days after the stock sold at 85 per cent, dividend off. The company have just paid five per cent in cash, and the have just paid five per cent in cash, and the sold at the first board to-day at 82% per cent. All who have held stock during the part six months have pocketed the nice profit of seventeen per cent. At this ite the stock will pay for itself in less than four years. Several of the best located Western railroads have done ven better than this, and there are new roads which ave bardly yet been heard of, that will do as well. The has been started under more favorable auspices, has thus far been more profitable, is in the course of a more rapid developement, and is likely to pay better at an than any railroad in the State of Illinois or lisconsin. In speaking of these works of internal imrovement, we have ever been particularly cautious, and can say, that in no instance has a mistake been ade. In all the old roads and in all the new roads, so made. In all the old roads and in all the new roads, so far as results have been realized, they have been in accordance with our predictions. In the Erie, Galena and Chicago, Milwaukie and Mississippi, Wiscousin Lake Shore, and Reading, they have all proved to be, either in a productive or unproductive way, just what we anticipated. We have placed upon record some prophecies relative to other roads which are in the course of furifilment. Financiering and which are in the course of fulniment. Financiering and mysterious management may put off to a later day the anticipated result, but it is as sure to be utilimately realized as the ising of the sun. At present we have a very early money market and an active specuative movement in the street. All hinds of stocks may for a few days tonger run up rapidly, but it is only the good, strong, sound dividend earning and dividend paying stocks that can be permanently sustained. In others the inflation may be important, but in cannot be otherwise than tem-

uoyant. Erie closed at 62½ per cent, with sales of bout three thousand shares. New York Central Rail cad was without change. There are very large shorts in this stock, and the Cemand is active. We should not be surprised to see it run up two or three per cent, but to one can expect it to be rustained. Speculation may in-tate it for a short time. Cleveland and Toledo was steady this afternoon, at prices current at the first board. Railroad bonds are moving up steadily. Goshen bonds sold to day at 58 per cent, and Illinois Central at 90% per cent. All first class bonds must improve permanently

The Assistant Treasurer reports to-day as follows:

annual dividend of four per cent. The Grocers' Bank a semi-annual dividend of five per cent, and an extra dividend of five per cent. The Island City Bank a ni-annual dividend of three and a half per cent. The Panama Railroad Company a semi-annual dividend of six per cent. The interest coupons on the bonds of the comoffice. The Irving Bank a semi annual dividend of four per cent. The Paterson and Ramapo Railroad a dividend of three and a half per cent.

The dividends of the Dwight Mills were formerly paid in May and November. The company was united with the Ferkins a few months since, and the latter has become extinct.

The amount of dividends is usually larger in January than in July, as several annual payments are made at that time. There are other companies which will pay dividends early in the month of July, but which are not yet officially declared. Among these are the Hamilton Woolen, Hill Mill and Lowell Bleaching Manufacturing Companies, Boston and Roxburry Mill Corporation, Boston Exchange Company, Firemen's and American Insurance Companies, and probably others. The Cheshire, Fitchburg, Lexington and West Cambridge (old), and Providence and Worcester Railroades, the Boston and Sandwich Glass, Chicoppe, Jackson Manufacturing Companies pass their dividends at this time. The New Bedford and Taunton Railroad not heard from.

The General Assembly of Rhode Island, at its late sea sion, granted charters to seven new banks. Three of them are located in Providence, and are called the Ma-rine, the Northern and the Moshassuck; two in Richmond, called the Richmond and Washington county; one in East Greenwich, to be called the Greenwich Bank; and one in Bristol, called the Pokanoket. A charter for a Savings Bank was also granted, to be located in Newport, called the Coddington Five Cents Savings Institution. Three new insurance companies were incorporated, to be located in Providence—the Gaspee, the Butler Mutual and the new gas companies-one in Providence and one in Newport-were also granted. The General Treasurer was authorized to renew the State loan of \$40,000, which is

Politics in the Pulpit.

[From the Philadelphia Ledger, July 1.]

Quite a scene of excitement occurred in the Church of the Epiphany on Sunday night, during a sermon delivered by Rev. Indiey A. Tyng. The reverent genticeman had reviously announced that he would proach a sermon on Kanasa affairs, and a large audience gathered in consequence. True to the announcement, Kanasa was the subject of his discourse, and in the course of his remarks, we are informed that the speaker was severe not only in his reprobation of slavery, but on the conduct of those who wished to introduce it into Kanasa. He denounced the federal government in a style which was anything but decorous, and certainly very unfit in a pulpit. Some of the congregation sat very uncasily under these remarks, and finally a respectable member of the church elit called upon to interrupt and recall the minister to his reason. He spoke of the sermon as objectionable in point of matter and in point of fact—that it was a deseration of the pulpit and of the served calling of the elegy to introduce such subjects, and to treat them in a style suited only to political and partisan harangues. This rebuke seemed rather to astonish and disconcert the clergy man. He pausest till the speaker had finished his discourse. The gentleman who administered the rebuke has the reputation of having manneatted a number of shaves, that would have been worth to him in money, had he chosen hold them, at least 5:0,000. The sermon less created quite a disturbance in the church. Some of the leading members denounce it was nature of which, joued with the infimity of human temper and judgment, necessarily leads to intemperance of thought and speach. If they are thoughed at all it should be in soothing the angrey passions which they generate with a view to restore the mattery of reason and judgment. This is the pulpit is no place for discussions, the nature of which, joued with the night of his congregation. There every man stand upon his own private judgment. He defers to no authority b

New York Harbor Enghoachments—Governor Price, and other gentlemen from this State, recently made an excursion around the harbor of New York with the Harbor Commissioners appointed to provent engreadements on the rivers by extending the docks, &c. Among other places visited were the Kill Van Kull and Newark bay, and the North river shores of our State to prohibit the extension of wharves out into the river, but it will be unjust in them to insist upon any limit short of what is imposed on the citizens of New York. They have already extended their docks a longer way into the river from time to time than is generally supposed, greatly enlarging their area, by filling out into the stream, and they cannot fairly ask New Jersey, which has been modestly standing back thus far, to withhold their improvements till they occupy at least as much of the river with docks as its New Yorkers do. It was intimated that many of the docks on the New York sale will be cut off.—Nevert Ade., June 30.
